

High Performance Sector

Québec Team

What an Olympic season for all skaters. What a feeling for beginners as well as for seasoned international competitors who wish to surpass themselves, enabling many of them to attain their objectives.

REGISTRATION PROCEDURES

The computerised registration program set in 2008 has been modified which was not completely successful. Corrections will be made for the 2010-2011 season. I mention that the use of computerised registration for the Québec Team members is essential in order to be compatible with Skate Canada procedures at the National Championships. We save on paper forms as well as meet specified schedules for skaters registration. We thank the volunteers who attended these registration sessions.

TRANSPORT AND HOSPITALITY ROOM

We had no problems with transportation. For each competition, we had reserved a hospitality room which was much appreciated by all.

LODGING

We had hotel problems at the Challenge Championships in Mississauga and it would not be advisable to go back to this hotel.

At the Junior and Canadian Championships, hotel service was impeccable.

SUPPORT STAFF

I wish to thank the members of the support staff who provided remarkable assistance to our skaters during the three national championships.
