Competitions sanctions Committee

We have applied the modifications that were suggested by the different competitions organising committees. The universal Notice of Competition now reflects the technical aspects of skating as well as offers a large number of categories.

The *"Politique sur l'émission des sanctions de compétitions"* has also been modified, including some corrections and additions. Competitions organising committees will have to consult this document prior to sending their request to the region, then to the Fédération. I wish to thank all organising committees that have filled their request form and forwarded it within the specified delays.

We have sanctioned nearly 125 competitions for all competitions held in the province. I wish to thank all the members of the local organising committees for their dedication.

The 2010-2011 universal Notice of Competition will be revised to include the technical criteria required by the changes made to Canadian and international rules.

Provincial competitions have been very successful. Competitors were inspired by the performances of our champions. Synchronised Skating structures have been revised this year. Regional championships involved 68 teams with 1118 skaters, a huge success.
