

Competitions Sector

Technical committee

OBJECTIVE

The main objective has been to continue the organisation of meetings during our provincial competitions to encourage discussions on the various changes made to programs content and to rules issued by Skate Canada and the ISU.

We have covered the activities of judges, referees and technical officials.

During our 2009 BMO Summer Championships, we have organised a “*Speed matching*” during which coaches and officials were invited and encouraged to ask questions. All questions have been answered.

All aspects of competitions have been covered:

- Technical marks
- Elements
- Changes made after the 2009-2010 season

We have ensured that the technical communiqués issued by the ISU and Skate Canada have reached the affected persons by email.
